

INTRODUCTION

The SJRMP Advisory Council and Action Team were created by AB 3603, which was signed by Governor Deukmejian on September 18, 1990. Although these groups have been meeting informally since fall 1989, they were formally recognized by Secretary for Resources Gordon Van Vleck in November 1990 and have been meeting monthly since then to provide for the orderly development and management of the water resources of the San Joaquin River system.

Membership of the Advisory Council includes the director or a designee of the director of a number of State and federal agencies, counties and cities within the area, entities representing water user interests within those counties, and environmental, fisheries, and wildlife groups. The Action Team is made up of members appointed by the Advisory Council.

Action Team subcommittees were formed in accordance with the legislation, based on the specific problem areas of flood protection, water supply, water quality, recreation, fisheries, and wildlife. An organization chart of SJRMP is shown on Figure 1.
